

## WORK IN PROGRESS

Time: 19th December, 2014 (Friday), 12:00

Place: ELTE-PPK, Institute of Psychology, Izabella utca 46, Révész Géza room (room 301)

### SCHEDULE

Fruzsina Elekes, Máté Varga, Ildikó Király: Sharing tasks fosters online level-2 perspective taking in adults (PhD)

Réka Pető: Scale error as an indicator of functional learning (MA)

Eszter Somos: Autobiographical memory retrieval with dual-task load (PhD)

Boglárka Kristóf, Teodóra Vékony: Emotionality of forbidden words in a first and a second language: The effect of bilingual priming of Hungarian and English taboo words in lexical decision (MA)

Petia S. Kojouharova, Attila Krajcsi: A gap in the number sequence 'breaks' the distance effect (PhD)

Ákos Laczkó, Gábor Lengyel, Attila Krajcsi: SNARC-effect with non-relevant numeric attributes (MA)

Orsolya Kiss, Krisztián Kasos, Attila Krajcsi: How do we represent negative numbers? (PhD)

Edina Fintor, Attila Krajcsi: Measuring the number knowledge by the Give-n task (MA)

Noémi Éltes, Attila Krajcsi: Domain-general feature matching mechanism in newborn infants (BA, pilot study)

Dávid Farkas, Susan Denham, Alexandra Bendixen, Dénes Tóth, Gábor Orosz, István Winkler: Stable idiosyncratic patterns in perceiving multistable sound sequences can be linked with individual differences in executive functions and personality (PhD)

Márta Virág: Competition between executive functions and probabilistic sequence learning (PhD)

Ágnes Bata: Pre-crastination and Executive Functioning (MA, pilot study)

Ágoston Török, Elisa Ferre, Elena Kokkinara, David Swapp, Patrick Haggard, Valéria Csépe: It's a long way to the top. Multisensory interaction behind vertical distance estimation (PhD)

Fanni Kling, Ágoston Török, Jean-Marie Pergandi, Pierre Mallet, Ferenc Honbolygó, Valéria Csépe, Daniel Mestre: Interaction between response set congruency and warning signals in a driving simulator task (BA)

Breaks will be held as necessary.
