

IV. Dubrovnik Conference on Cognitive Science

10-13 May 2012, Dubrovnik, Croatia

Memory control and retrieval

Central European Cognitive Science Association (CECOG) launches its fourth international conference in the historical town of Dubrovnik, Croatia.

The focus of the conference this year is
memory control and retrieval.

Keynote Speakers

Paul W. Burgess

University College London, UK

Lars Nyberg

Umeå Center for Functional Brain
Imaging, Sweden

Martin A. Conway

University of Leeds, UK

Ken A. Paller

Northwestern University, USA

Invited speakers

Simon Hanslmayr

University of Konstanz, Germany

Antonino Vallesi

International School for Advanced
Studies, Italy

Mihály Racsomány

Budapest University of Technology
and Economics, Hungary

Ines Wilhelm

University of Lübeck, Germany

ABOUT THE CONFERENCE

The Dubrovnik Conference on Cognitive Science (DuCog) is a small-medium size annual conference with up to 80 participants. Every year a specific topic is covered by keynote speakers and invited speakers. The program of the conference includes:

Poster sessions

The core of the conference will consist of student research reports in the form of peer reviewed posters.

Keynote talks

The keynote talks concentrate on the keynote's own research, providing a general framework of the field.

Invited speakers

Invited speakers will provide a short talk reviewing their own recent research in the field of memory control and retrieval.

Social program

The medieval city of Dubrovnik provides a wide choice of organized and spontaneous social activity.

ABSTRACT SUBMISSION

The conference is open for scholars and students doing research on **all** aspects of cognitive science.

Submit a poster abstract!

Poster selection will be based on quality, however in case of equal contributions posters related to the conference topic will be preferred.

Submission is Open!

For further information visit the conference website at

www.cecog.eu

ABOUT THE ASSOCIATION

The **Central European Cognitive Science Association** fosters scientific cooperation in the Central and Eastern European region in the field of cognitive science.

The main activity of the Association is the organization of the DuCog Conference Series.

The Association also publishes **Learning & Perception**. The journal aims to become a regional leader in cognitive science.
